

A New Kind of Orthopedic Care is in Town...**OrthoNOW!**

Upstate Orthopedics is excited and proud to announce the opening of **OrthoNOW!** a new program in our office. **OrthoNOW!** is an after hours walk-in program for urgent orthopedic problems. The program offers patients immediate access to a team of orthopedic specialists during daytime, evening and weekend hours for sprains, breaks, dislocations and sports injuries. In lieu of going to the emergency room for an urgent orthopedic issue, patients can choose to come to **OrthoNOW!** to avoid long emergency room waits and higher out of pocket facility co-pays. The program is staffed by the orthopedic surgeons and mid level providers from Upstate Orthopedics.

OrthoNOW! and Upstate Orthopedics are located at the region's most comprehensive center for orthopedic medicine, the Upstate Bone & Joint Center in East Syracuse. This facility located at 6620 Fly Road in East Syracuse, offers everything under one roof, including an ambulatory surgery center, imaging services, custom orthotics and prosthetics, physical and occupational therapy, a pain management center, a lab for blood work and a state of the art Upstate Medical University conference and training center that offers special health care programming for both providers and patients. The Upstate Bone & Joint Center was built around the needs of our patients and offers easy access from all major highways, free parking, and easy drop-off and pick-up.

At Upstate Orthopedics, our orthopedic physicians and staff provide expert and personalized care for the bone and joint problems that threaten the comfort and function of thousands of individuals each year. Our surgeons combine decades of experience and knowledge, through the most cutting edge research, to identify the best treatment and surgical options to effectively manage your orthopedic problems.

Our physicians are also professors of medicine at Upstate Medical University and University Hospital. This affiliation creates a constant flow of residents practicing right alongside our surgeons, resulting in not only more focused time spent with each patient, but a consistent, proven, hands-on experience to produce top-of-the-line orthopedic surgeons from the Syracuse area.

Orthopedics is a medical specialty that deals with quality of life. Whether your aim is to return to competitive sports, get back to work or simply to walk without pain, our goal is to give you the opportunity to enjoy the most out of life. Our physicians and support staff are dedicated to helping our patients lead active lives.

The physicians and staff at Upstate Orthopedics and **OrthoNOW!** are excited to participate in the annual Dunn Tire Mountain Goat Run. Look for our booth and fliers at the post-race party!
